

Hazard Control Assessment

Prioritizing and controlling hazards are key to improving safety and operational efficiency at any facility. EMC's loss control professionals can conduct a comprehensive on-site assessment to identify operational hazards unique to your location. EMC identifies and ranks hazards that can have the greatest impact on your organization and proposes valuable solutions to control them.

TOP IDENTIFIABLE RISKS

- Commercial auto/fleet
- Material handling/ergonomics
- Slips, trips and falls

RISK IDENTIFICATION PROCESS

- Analyze loss history
- Compare industry trends
- Complete comprehensive on-site inspection
- Review self-identified risks

BENEFITS OF A HAZARD CONTROL ASSESSMENT*

- Improve product quality and employee morale
- Increase productivity
- Reduce overall cost of doing business
- Reduce premium (with improved loss history)
- Reduce risks

HAZARD CONTROL ASSESSMENT CONSIDERATIONS

- Complexity of operations
- Level of risks
- Size and number of locations
- Size of organization
