Cautionary Note Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides issuers the opportunity to make cautionary statements regarding forward-looking statements. Accordingly, any forward-looking statement contained in this presentation is based on management’s current beliefs, assumptions and expectations of the Company’s future performance, taking into account all information currently available to management. These beliefs, assumptions and expectations can change as the result of many possible events or factors, not all of which are known to management. If a change occurs, the Company’s business, financial condition, liquidity, results of operations, plans and objectives may vary materially from those expressed in the forward-looking statements. The risks and uncertainties that may affect the actual results of the Company include, but are not limited to, the following:

• catastrophic events and the occurrence of significant severe weather conditions;
• the adequacy of loss and settlement expense reserves;
• state and federal legislation and regulations;
• changes in the property and casualty insurance industry, interest rates or the performance of financial markets and the general economy;
• rating agency actions;
• “other-than-temporary” investment impairment losses; and
• other risks and uncertainties inherent to the Company’s business, including those discussed under the heading “Risk Factors” in the Company’s Annual Report on Form 10-K.

Management intends to identify forward-looking statements when using the words “believe,” “expect,” “anticipate,” “estimate,” “project,” or similar expressions. Undue reliance should not be placed on these forward-looking statements. The Company disclaims any obligation to update such statements or to announce publicly the results of any revisions that it may make to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

Who We Are

- Downstream holding company of Employers Mutual Casualty Company (EMCC)
- EMCC began in 1911, EMCI IPO in 1982
- Trade on NASDAQ: EMCI

- **Property and Casualty Insurance Segment** *(78% of premiums earned)*
  - 2,070 independent agency relationships
  - 41 state distribution network, licensed in all 50 states and District of Columbia
  - Supported by decentralized network of 16 local branch offices
  - 30% participation in EMCC pool
  - Diversified premiums (90% commercial / 10% personal)

- **Reinsurance Segment** *(22% of premiums earned)*
  - EMCC has assumed reinsurance business since 1950s
  - 100% Quota Share Agreement with EMCC, but some contracts written directly
  - 83% of business from 19 brokers (e.g. AON, Guy Carpenter, etc.)
  - 17% of business from participation in MRB underwriting association
Corporate Structure

Employers Mutual Casualty Company
(Founded in 1911)

Public Shareholders

EMC Insurance Group Inc.
(IPO in 1982 - Follow-on offerings in 1985 and 2004)

Property and Casualty Insurance Segment
(Aggregate 30% pool participation)

- Dakota Fire Insurance Company
- EMCASCO Insurance Company
- Illinois EMCASCO Insurance Co.
- EMC Underwriters, LLC

Reinsurance Segment
(100% Quota Share Agreement with EMCC)

- EMC Reinsurance Company

*Ownership as of September 30, 2016
Benefits of Pooling Agreement

• “A” (Excellent) rating with stable outlook from A.M. Best Company
• Risks spread risk over a wide range of geographic locations, lines of insurance written, rate filings, commission plans and policy forms
• Produces more consistent underwriting results
• Benefits from capacity of the entire pool
  • $1.6 billion in direct premiums written in 2015
  • $1.4 billion of statutory surplus as of Dec. 31, 2015
• Merger and acquisition flexibility
• Economies of scale in operations and purchase of reinsurance
Benefits of Quota Share Agreement with EMCC

• EMCC’s surplus ($1.3 billion as of Dec. 31, 2015) and financial strength exhibits ability to pay claims owed to ceding companies
• Name recognition and long-standing domestic and international relationships with EMCC
• Competitive advantage being licensed in all 50 states and District of Columbia
• Utilize EMCC’s “A” (Excellent) rating from A.M. Best Company (EMC Re also rated “A”)

Key Reasons to Invest in EMCI

- Dividend yield of 3.2% as of November 9, 2016
- Access to large capital base
- Diversified, seasoned book of business
- Regional, decentralized operating structure
- Conservative balance sheet
- Experienced senior management

Total Stockholder Return*

- 1-Year: 19.4% (EMCI) 15.4% (S&P 500)
- 3-Year: 13.5% (EMCI) 11.1% (S&P 500)
- 5-Year: 20.9% (EMCI) 16.3% (S&P 500)

*Total annual stockholder return is the percentage change in the stock price plus the amount of dividends paid, assuming dividend reinvestment, to the stock price at the beginning of the one-year, three-year and five-year periods ending September 30, 2016.

Value of Local Market Presence

• Decentralized Decision Making/Guided Autonomy:
  • Marketing
  • Underwriting
  • Risk Improvement
  • Claims

• Strengthens agency relationships, which we believe allows us to quote their best performing business

• Develop products, marketing strategies and pricing targeted to specific territories

• Individual approaches within EMC risk appetite and framework

• Retention levels consistently stay between 80%-90%
  • 86.7% at September 30, 2016
2015 Direct Premiums Written by Branch
Property and Casualty Insurance Segment Commercial Lines

The map shows the distribution of 2015 direct premiums written by branch, with different states shaded to indicate varying percentages. The states are color-coded to reflect the percentage of direct premiums written in each state for the Commercial Lines segment.

Key percentages include:
- Nevada: 3.9%
- Texas: 5.1%
- New York: 5.1%
- Illinois: 5.3%
- Florida: 4.9%
- California: 5.1%
- North Carolina: 9.1%
- South Carolina: 4.6%
- Virginia: 4.6%
- New Jersey: 4.2%
- West Virginia: 5.8%
- North Dakota: 4.1%
- South Dakota: 7.3%
- Colorado: 15.2%
- Arizona: 3.5%

Each state's percentage is displayed on the map to provide a visual representation of the data.
New in 2016

- New and revised intercompany reinsurance agreements
- New reserving methodology (implemented in third quarter) – Accident year ultimate estimate approach
  - Increased transparency of drivers of performance
  - Better conform to industry practices
- Personal lines focused accountability
- Accelerate commercial auto profitability
GAAP Combined Ratios

*Under the property and casualty insurance segment’s prior reserving methodology, large losses had a direct impact on earnings. Under the new reserving methodology implemented in the third quarter of 2016, large losses are taken into consideration when establishing the current accident quarter/year ultimate estimates of losses, but there is no longer a direct relationship between large losses and earnings. As a result, it is no longer meaningful to report large losses separately.

NOTE: Record catastrophe and storm losses were reported in 2008 and again in 2011. Over the most recent 10-year period, catastrophe and storm losses have annually averaged 10.3 percentage points of the combined ratio, calculated as of Dec. 31, 2015. However, excluding the record losses reported in 2008 and 2011, catastrophe and storm losses would have annually averaged 8.8 percentage points of the combined ratio.
Investment Portfolio

</table>

- Fixed income asset class remains rich; however, value can be found on security by security basis
- Equities fully valued
  - Maintain tail-risk hedge to alleviate downside risk
  - Hedge cost reduces equity portfolio return by 1.5% – 2% annually, dependent upon equity market volatility

*Investment securities purchased under reverse repurchase agreements of $16.9 million are not reflected in total investments; however, income from these agreements is included in net investment income.

**Securitized assets include commercial mortgage-backed, residential mortgage-backed and other asset-backed securities.
Stockholder Dividends

Quarterly Cash Dividend

- Paid dividend quarterly since IPO in 1982
- Dividend has never been reduced
- Increased quarterly dividend 10.5% in 2016, demonstrating:
  - Confidence in financial condition and long-term outlook
  - Desire to improve total stockholder return
- Dividend yield of 3.2% as of November 9, 2016

8.2% CAGR

[Graph showing quarterly cash dividends from 2011 to 2016 with labels for 1Q, 2Q, 3Q, 4Q]
Maximizing Stockholder Value

* Approximately $0.88 per share of the increase in 2013 is attributable to a change in EMCC’s postretirement healthcare plan.

NOTE: All prior period per share amounts have been adjusted to reflect the three for two stock split completed on June 23, 2015.

New in 2016 - Accelerate Commercial Auto Profitability

• Commercial auto represents ~25% of property and casualty insurance segment’s commercial business
• Projected combined ratio of 109% for industry in 2017
  • Lower gas prices led to increase in miles driven and loss frequency, coupled with increase in severity
  • Forecasting similar deterioration in our book of business if no steps taken to improve profitability
• Implemented multi-year Accelerate Commercial Auto Profitability project
  • Anticipate returning to underwriting profitability within next three years, with improvement starting in late 2016
  • Eight teams to complement local branch efforts, each focused on different opportunities such as underwriting, pricing and claims handling
  • Introduce better tools to help agencies struggling with commercial auto profitability, such as telematics solution
2016 Intercompany Reinsurance Treaties

Property and Casualty Insurance Segment
Catastrophe Treaties Between EMCI and EMCC

- **Jan. 1 – June 30**
  - Cost: $6.3M
  - Retention: $20M
  - Limit: $24M

- **July 1 – Dec. 31**
  - Cost: $1.5M
  - Retention: $12M
  - Limit: $24M

Reinsurance Segment Catastrophe Treaties Between EMCI and EMCC

- **Per Occurrence Treaty**
  - Cost: $2.0M
  - Retention: $10M
  - Limit: $100M

- **Annual Aggregate Treaty**
  - Cost: $3.1M
  - Retention: $20M
  - Limit: $100M

20% Co-participation

- EMC Re will purchase additional reinsurance protections (Industry Loss Warranties) in peak exposure territories
- Ceded premiums earned of approximately $3.5 million in 2016

(1) Operating income and operating income per share are non-GAAP financial measures. See p.30 for additional information regarding its calculation.
(2) Reflects a significant reduction in the amount of pension and postretirement benefit costs allocated to the Company, as a result of a plan amendment.
(3) Based on PLRB event occurrence numbers for the P&C insurance segment and PCS catastrophe serial numbers for the reinsurance segment.
(4) The Company defines as reported current accident year losses greater than $500 for the EMC Insurance Companies pool, excluding catastrophe and storm losses. See p. 16 for additional information regarding why it is no longer meaningful to report large losses separately for the nine months ended September 30, 2016.

NOTE: All prior period per share amounts have been adjusted to reflect the three for two stock split completed on June 23, 2015.
Non-GAAP Information

- Operating income is calculated by excluding net realized investment gains/losses (defined as realized investment gains and losses after applicable federal and state income taxes) from net income. While realized investment gains (or losses) are integral to the Company’s insurance operations over the long term, the decision to realize investment gains or losses in any particular period is subject to changing market conditions and management’s discretion, and is independent of the Company’s insurance operations. The Company’s calculation of operating income may differ from similar measures used by other companies, so investors should exercise caution when comparing the Company’s measure of operating income to the measure of other companies. Management’s projected operating income guidance is also considered a non-GAAP financial measure.

- Management believes operating income is useful to investors because it illustrates the performance of the Company’s normal, ongoing operations, which is important in understanding and evaluating the Company’s financial condition and results of operations. While this measure is consistent with measures utilized by investors and analysts to evaluate performance, it is not intended as a substitute for the GAAP financial measure of net income. Therefore, the Company has provided the following reconciliations of the non-GAAP financial measure of operating income to the GAAP financial measure of net income.

The reconciliations of operating income to net income is as follows:

<table>
<thead>
<tr>
<th>($ in thousands)</th>
<th>Nine Months Ended September 30,</th>
<th>Year Ended December 31,</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating income</td>
<td>$25,329</td>
<td>$32,756</td>
</tr>
<tr>
<td>Net realized investment gains (losses) (after tax)</td>
<td>(418)</td>
<td>7,511</td>
</tr>
<tr>
<td>Net income</td>
<td>$24,911</td>
<td>$40,267</td>
</tr>
</tbody>
</table>

The reconciliations of operating income per share to net income per share is as follows:

<table>

</tbody>
</table>

- Statutory data is prepared in accordance with statutory accounting principles as defined by the National Association of Insurance Commissioners’ (NAIC) Accounting Practices and Procedures Manual. Statutory data is publicly available, and various organizations use it to calculate aggregate industry data, study industry trends and compare insurance companies. Under statutory accounting principles, property/casualty premiums written is the cost of insurance coverage, and refers to premiums for all policies sold during a specified reporting period. Management analyzes trends in premiums written to assess business efforts. Premiums earned, used in both statutory and GAAP accounting, is the recognition of the portion of premiums written directly related to the expired portion of an insurance policy for a given reporting period. The unexpired portion of premiums written is unearned premiums, and represents the portion that would be returned to a policyholder upon cancellation.
